

City of Trenton

Building Permit Instructions

This information has been compiled from the current building and zoning ordinance of the City of Trenton for your information. It is not complete nor is it intended to be complete. A complete copy is available for your viewing at City Hall.

Items to be submitted for permit and plan review:

- ◆ Completed Building Permit Application
- ◆ A plot plan showing all measurements of existing and completed structures and distances between structures (new and existing) to property lines.
- ◆ Working set of construction plans

Application for Permit: Building permit application shall be filled out fully and submitted to City Hall; including drawings and blueprints, for review prior to work being started. The information is reviewed to ensure it complies with existing building codes and zoning regulations. Allow a minimum of 10 business days for a review of the permit and notification of approval or denial of permit.

Determination of Property Lines: The City of Trenton accepts no responsibility in determining the location of property lines.

It shall be the responsibility of the property owner to ensure that permits and approvals are secured and posted prior to work commencing. A property owner may authorize a contractor to obtain the permits, but the property owner is ultimately responsible. Failure to obtain necessary permits could result in fines assessed to the property owner.

Building Inspections

Please contact one of the following individuals for inspection of project.

Wes Barone 359-2013 Ext. 2116

Inspector shall have a 24-hour notice. Building inspector must inspect each of the following items that apply to your project before proceeding to the next step. Inspection will be done on business days only. No inspections will be done on weekends or holidays.

- 1. Inspect footings and/or piers after the footing forms and reinforcement are in place and before concrete is poured.**
- 2. Inspect foundation walls after forms are set and reinforcement is in place and before concrete is poured.**
- 3. Inspect concrete slab when base, reinforcement and vapor barrier (when required) are in place and before concrete is poured.**
- 4. Inspect when all framing is complete and all electrical wiring, plumbing, heating ducts and other mechanical equipment are installed and before wallboard or insulation is installed.**
- 5. The final inspection is made after all glazing, egress doors and windows, guardrails, smoke detectors, interior wallboard, wall coverings, exterior siding and safety equipment are installed and the building is ready for occupancy.**

For questions or more information, please contact our Building Inspector Wes Barone
